

## Types of Partners

### OUTREACH PARTNERS

Everyone can share information about First Five SC.

We all have a role to play in supporting our state's youngest children. With First Five SC, you can connect parents and caregivers to publicly funded programs that help children and families thrive.

Visit us at [first5sc.org/share](https://first5sc.org/share) to find sharable graphics

### NAVIGATION PARTNERS

First Five SC was built for families to self-navigate and learn about publicly funded programs and services available to them across the state. While many families are able to use First Five SC as a self-service portal, some may want more help with complex family and household situations. If you are a statewide early childhood agency that assists families through information and referrals, we may be able to partner to assist families in navigating to the best fit programs for them.

### PROGRAM PARTNERS

Publicly funded community partners (like community agencies or nonprofits, contractors, or medical providers) may be added with the authorization of their public agency funder.

**There are several ways to include your program or service on First Five SC, and here's how we can work together:**

#### PROVIDER LISTING

Programs can be listed on the Find a Provider page so that families can find resources available in their area.

#### ELIGIBILITY SCREENER

If families enroll in your program based on specific criteria, we can work to include you on the screener and help you access their contact information if you'd like to provide them with more information.

#### COMMON APPLICATION

After families complete the screener, if you also are included on the common application, they can then directly submit their information to you in order to begin the enrollment process. You can receive detailed household information and documentation. We can discuss how to best share this information with your enrollment staff.
